

DEVICE

Model: FortiGate-100F
Version: v7.6.2 build1234
Serial: FG10*****65
Hostname: FW-EDGE-MAD-01
VDOM: root

NEEDS ATTENTION

FAIL 2

WARN 16

PASS 9

INFO 3

System & Health

PASS Version & hardware model

FortiGate-100F 7.6
Model: FortiGate-100F Version: v7.6.2 build1234 Serial: FG100FTK20098765 Hostname: FW-EDGE-MAD-01

PASS Resources & conserve mode

Memory 80%, conserve off
Memory used: 80% CPU: 12% busy Conserve mode: off

FAIL FortiGuard connectivity & per-module licensing

Attention: IPS Attack Engine, Web Filtering
AV Engine: 264d Virus Definitions: 264d IPS Attack Engine: 11d Web Filtering: EXPIRED FDS: available

FAIL HA sync & checksum

HA OUT-OF-SYNC: FG100FTK20012340 (checksum mismatch)
Members out-of-sync: 1 HA events logged: 3 Last role change: 2026-06-05

WARN Time synchronization (NTP)

NTP NOT synchronized - breaks certs/SAML/HA/log correlation
Synchronized: no

WARN Crash log review

2 crash entries, newest 28d ago
Crash entries: 2 Most recent: 2026-05-12 Age: 28d

PASS Config error log

No config errors logged

WARN Certificate expiry & CA chain (per-VDOM)

SSL-Inspection-CA in 11d; vpn-portal-gw in 29d
Fortinet_Factory (device): 8241d SSL-Inspection-CA (SSL-inspection): 11d vpn-portal-gw (remote-gateway): 29d

PASS Hardware / factory certificate

Hardware/factory certificate OK (all checks passed)
Valid to: 2049-01-01 Days left: 8241

PASS Conserve mode (kernel + shared-memory)

Conserve off (kernel + shared-memory)
Memory used: 80% Kernel conserve: off SHM conserve: off

PASS Hardware sensors (temp / fan / PSU)

4 sensors, all within range
Sensors: 4

PASS FortiAnalyzer log shipping

FortiAnalyzer logging UP
Connection: UP Registration: registered

Network

WARN Interface link status (hardware NIC)

Addressed ports not up/1000full: port2 (half-duplex); port4 (link down, unknown-duplex, ?Mbps)
Physical ports: 4 Addressed ports: 3 Ports with rx/tx errors: port2(330)

INFO Routing sanity (default route, blackhole, unresolved)

1 blackhole route(s) (intentional?)

Routes: 5 Default route: yes Blackhole routes: 1

WARN Dynamic routing adjacencies (BGP / OSPF)

BGP 198.51.100.7 Active; OSPF 10.20.0.9 ExStart/DR

Adjacency issues: 2

PASS Session table

18422 sessions, 312/s setup

Sessions: 18422 Setup rate: 312/s

WARN Interface error/drop counters (netlink)

Errors/drops: port2 (330 err, 44 drop)

Interfaces: 3

WARN ARP table (gateway resolution)

Unresolved ARP (L2 next-hop down?): 10.20.0.9

ARP entries: 3 Per interface: port1:1, port2:1, port4:1 Incomplete: 10.20.0.9

INFO Policy routes / SD-WAN rules in kernel

1 policy route(s)/SD-WAN rule(s) in kernel (override routing table)

Policy routes: 1

SD-WAN

WARN SD-WAN health-check (SLA per member)

1/2 SD-WAN members dead

SLA members: 2 Dead: 1

WARN SD-WAN rules / service path selection

Service(s) 2 have no selected member - traffic blackholed

SD-WAN rules: 2 Rules with no path: 1

WARN SD-WAN member interfaces

1 SD-WAN member(s) dead

Members: 2 Dead: 1

WARN SD-WAN SLA transition log (recent flaps)

1 SLA member went down recently (flapping?)

Transitions logged: 3 -> dead: 1

VPN

WARN IPsec tunnels (phase-2 selectors up/down)

Down/incomplete: HQ-to-Branch2

IPsec tunnels: 3 Selectors down: 1

WARN IKE phase-1 gateways

1 phase-1 gateway(s) not established

IKE gateways: 2 Established: 1

INFO SSL-VPN active sessions

2 SSL-VPN user(s) connected

Login users: 2

WARN IPsec tunnel traffic & errors (per SA)

tx>0 but rx=0 (asymmetry): HQ-to-Branch2

Tunnels (SA): 2

Security / Policy

WARN Dead policies (hit-count 0)

2 dead policies (idx 7, 12) - candidates to remove/reorder

Policies seen: 5 Dead (hit-count 0): 2

WARN Web filter rating servers

2 servers reachable, 2 packet(s) lost

Service: Enable Rating servers: 2 Best RTT: 12ms Total lost: 2

DNS & Resolution

PASS DNS config, server readiness & resolution

DNS resolves, 4/4 servers ready

Primary: 96.45.45.45 Secondary: 96.45.46.46 DNS-over-TLS: disable DNS servers ready: 4/4 Best RTT: 1ms Servers with recent failures: 1 Resol
